

## Mazda B2200 Sanding Weber adapter plates

Written by Mazda Mitch and Cusser

Get a flat surface, I have a piece of aluminum, some use glass. Affix 180 grit sandpaper, WD-40 or rubbing alcohol for lubricity, sand flat to a machined looking surface.

When done you're hand will be tired and look like you gave the tin man from the wizard of Oz a handjob.

Thin double-sided tape

Highs and lows visible
